

Coming Spring 2011!

Glazed Thin Brick

McNear Brick & Block, a leading national manufacturer of Fired Clay Thin Brick, has developed an exciting new line of *Glazed Thin Brick*, which blends the beauty of ceramic tile with the strength and utility of brick.

McNear is Green!

As with our entire line of clay bricks, we manufacture our *Glazed Thin Brick* with a very high recycled content: typically above 95%! By so doing, we avoid the environmental costs of mining clays, and overflowing landfills.

A Variety of Textures

McNear *Glazed Thin Brick* is available in textures ranging from flat and smooth, to our unique Sandmold surfaces. Dramatic effects can be produced by mixing and juxtaposing textures, as well as colors.

Bold, Unusual Colors

Based on brick technology and materials, our *Glazed Thin Brick* colors can vary wildly from those made by traditional tile manufacturers.

Strong and Durable

McNear Thin Brick meets the highest ASTM standards, and are classified as Severe Weathering, meaning they are appropriate for use on exteriors in freeze/thaw environments.

Sizes and Shapes

McNear *Glazed Thin Brick* are available in traditional brick sizes and shapes, including corners and caps. Sizes range from Modular (7-5/8 x 2-1/4) to Utility (11-5/8 x 3-5/8), to Pavers (3-7/8 x 8-1/8).

For more information on this new product line, contact us at 415-454-6811 or email us at glazedthinbrick@mcnear.com.

We are actively seeking distributors for this exciting, new product line; contact Mark O'Keefe (mokeefe@mcnear.com, 415-306-3580) to learn more.
