McNear Brick & Block opened in 1868 to support the gold-fueled construction boom in San Francisco and surrounding Bay Area cities. Back then, our workers made bricks by hand and used wheelbarrows to load them onto scow schooners for delivery to the many small ports lining San Francisco Bay.

The days of horse and sail are long gone, but the landmarks built with our products, such as Ghirardelli Square and the Golden Gate Bridge, remain. So too, does our commitment to beauty and durability.

Our product lines have also changed and grown. We now manufacture a much wider range of clay brick products, including our new Thin Brick, which we ship across the country. We are also now a leading manufacturer of Interlocking Pavers, and the Segmental Retaining Walls shown in this brochure. With all our products, from bricks to pavers to walls, we are distinguished from our competitors by our high quality and superior colors.

Visit www.mcnear.com, to find out more about McNear’s products and history, or to order brochures of our other product lines.
McNear Brick & Block is the exclusive Northern Californian manufacturer of the VERSA-LOK® family of segmental retaining walls. Our VERSA-LOK retaining walls have revolutionized the way that Californian landscapes are shaped, terraced, and used. The advantages of VERSA-LOK Retaining Walls are many: they are attractive, durable, affordable, strong, and versatile.

McNear manufactures a wide range of Retaining Wall Systems, varying in size, appearance, and capabilities. These systems can be used alone or in conjunction to build almost any detail, including straight and curved walls, corners, stairs, seats, and planters.

McNear Retaining Walls are distinguished by our broad range of natural color blends, and our realistic stone textures. These beautiful walls add timeless beauty, functionality, and value to any landscape. Our retaining walls also blend naturally with our many styles of Interlocking Pavers.

Square Foot
Square Foot

For a more majestic presence, our Square Foot wall system utilizes larger-scale, cored wall-units in either Classic or Weathered finishes. This versatile, pinned system can build inside or outside curves and corners. Square Foot walls can be built with a traditional 1-inch setback or near-vertical, and will accommodate geogrid reinforcement to build walls to any height.

VERSAGreen® is here!

The new VERSA-Green Plantable Wall System is truly the greenest retaining wall available. It combines the durability and strength of a VERSA-LOK segmental retaining wall with the lush beauty of a hanging garden.

Colors and Textures: Versa-Green can be ordered in either Classic or Weathered textures, and in any of our colors (Tan, Gray, Merlot, Mojave, Serpentine, Shasta, Sierra, Sonoma, and Torino), but lead times and minimum orders may apply. Call for availability of specific colors.

*Weathered Mosaic walls are comprised of Standard, Cobble, Accent, and Half Accent units arranged in “panels” 10 inches high and 24 inches wide. There are four different panel configurations which can be arranged in any order to form a random pattern.*
**Specifications (continued)**

**Reinforced Wall Typical Section**

This cross section illustrates the typical components of VERSA-LOK Standard retaining walls. Mortarless Standard walls are installed on granular leveling pads and do not require concrete footings below frost. The amount and layout of drainage materials and geosynthetic soil reinforcement is site/soil dependent and should be designed by a qualified engineer. The ¾ inch setback of each unit creates a batter of approximately seven degrees. Battered walls are structurally more stable than vertical walls because gravitational forces “pull” walls into retained soil.

For more information on reinforced wall installation, visit VERSA-LOK’s Web site: [www.versa-lok.com](http://www.versa-lok.com).

Accessories

Standard Adhesives

This is a high-strength, high-quality, structural grade construction adhesive designed for retaining walls, masonry and paving stones. It is durable enough to withstand extreme wear and tear including heavy vehicular traffic. Retaining Wall adhesive applies easily for a long-lasting, professional, all-weather installation.

Grids

VERSAs-LOK® VERSA-Grid™

VERSAs-LOK® VERSA-Grid helps soil reinforcements and helps wall stability. Its high tenacity, multifilament polyester yarns are resistant to natural chemicals, alkalis and acids so once you put it down, it won’t degrade.

And installing VERSA-Grid is easy, too. Just unroll flat and make sure the VERSA-Grid is perpendicular to the wall face.

VERSAs-LOK® Accessories

VERSAs-LOK® VERSA-TUFF® Pins and Snap-Off Pins®

VERSAs-TUFF nylon/fiberglass pins are used to interconnect VERSA-LOK retaining wall units and help provide consistent alignment. Pins are non-corrosive and will not rust or stain wall faces. Snap-off Pins are used for Accent, Cobble, and Mosaic systems.

VERSAs-LOK® VERSA-LIFTER™

The VERSA-LIFTER makes it easier to lift and place units, especially on the base course. The two prongs on the lifter are placed into the holes in the VERSA-LOK unit. The action of lifting the handle secures the lifter to the unit and makes for easy, balanced lifting and placement. VERSA-LIFTERS are available from your local supplier.
